PROFESSIONAL SUMMARY

Operational transformation and analytics professional with 5+ years of experience supporting large-scale change programmes — from process redesign and digital enablement to stakeholder engagement, data analysis, and executive reporting. Proven ability to translate complex operational data into clear insights and communications that accelerate delivery, combining hands-on programme support with AI-enabled process improvement. Experienced working across Finance, Technology, and Operations in global, matrix environments. Backed by an MBA in Finance & IT (91%) and a BCG Strategy Consulting Forage certification.

WORK EXPERIENCE

Goldman Sachs

Associate – Operational Transformation & Change Analytics

Bangalore · July 2025 – Present · Full-time

Providing analytical, content, and operational support across high-priority internal transformation initiatives — partnering with programme managers and cross-functional stakeholders to accelerate delivery, track project performance, and communicate change progress to senior leadership.

Transformation Programme Support & Delivery

- **Kept a \$2.6B+ regulatory transformation programme on track across 30 EEA countries** — owning governance documentation, KPI tracking, and risk escalation that ensured workstreams met delivery milestones on time and within scope.
- **Eliminated manual reporting bottlenecks entirely** by building AI-enabled automation tools (Python, LLMs, ChatGPT) — converting multi-hour manual workflows into automated pipelines and materially improving data quality for programme decision-making.
- **Accelerated cross-functional alignment** across Finance, Compliance, Product, and Technology — resolving data blockers and coordinating stakeholder inputs to maintain delivery momentum across multiple workstreams simultaneously.
- **Reduced adoption risk on change initiatives** by conducting change impact analysis, identifying affected user groups, and developing targeted enablement and communication materials to embed new processes and behaviours.

Data Analysis, Insights & Executive Communications

- **Delivered \$442K+ in measurable business outcomes** through quantitative analysis of 16,000+ accounts — designing a risk-scoring and segmentation framework that surfaced high-priority exposures and turned raw data into a prioritised remediation roadmap.
- **Enabled faster, more confident senior decisions** by building executive dashboards and scorecards that synthesised complex multi-workstream programme data into concise, visually clear narratives for Finance and Compliance leadership.
- **Improved reporting accuracy and speed** by validating data inputs, identifying trend anomalies, and distilling operational findings into crisp presentation formats — consistently meeting tight governance reporting cadences.

Birlasoft

Senior Consultant – Digital Transformation & Process Improvement

Noida · June 2022 – July 2025 · Full-time

Led process redesign, change management support, and programme delivery across SAP S/4HANA digital transformation engagements — partnering with client leadership to define end-state operating models, support user adoption, and ensure transformation initiatives delivered measurable operational improvements.

Process Redesign & Operational Improvement

- **Re-architected Finance and Operations workflows** across SAP S/4HANA programmes — mapping current-state processes, defining future-state operating models, and building phased implementation plans that translated transformation strategy into executable delivery steps.
- **Secured executive investment for transformation programmes** by developing detailed business improvement plans, ROI analyses, and investment evaluations — giving leadership the financial clarity to prioritise portfolio decisions confidently.
- **Freed significant operational capacity** by building automated financial reporting tools that replaced manual processes across multiple client accounts — improving accuracy, cutting cycle times, and enabling teams to focus on higher-value analytical work.
- **Strengthened transformation business cases** through competitive benchmarking and industry research — translating market data and best-practice analysis into actionable strategic recommendations for client leadership.

Change Management, Stakeholder Engagement & Communications

- **Drove successful user adoption** on change initiatives — conducting change impact analysis, segmenting affected groups, and developing targeted enablement materials and training documentation that embedded new processes durably.
- **Maintained stakeholder confidence across simultaneous client engagements** by translating complex project objectives into clear employee communications, steering committee presentations, and programme status reports that kept decision-makers aligned and informed.
- **Kept projects on course and within budget** by owning governance artefacts — requirements traceability matrices, change records, and milestone trackers — ensuring programme managers had consistently accurate, accessible data at every review gate.
- **Accelerated iterative delivery** in Agile environments — supporting sprint ceremonies, tracking progress against objectives, and coordinating cross-functional collaboration across Finance, Technology, and Operations to sustain momentum throughout the transformation lifecycle.

SS Media & Communications

Business Associate

New Delhi · Feb 2019 – Aug 2020 · Full-time

- Built KPI dashboards and operational performance reports — tracking business metrics and translating data into clear, visually compelling insights for senior management on a regular reporting cadence.
- Conducted **market and competitive research** — analysing industry trends and summarising findings into concise management briefings to inform strategic decisions.
